

## Consider Emerson Smart Wireless

Imagine being able to access all the valuable information that exists in your plant. Envision the ability to add measurement points that were previously too costly to access.

- No more wires. No more limits.
- What problems could you solve?
- How much could you improve your plant's productivity?

**Numerous customers from every industry are receiving benefits from Smart Wireless today!**  
*Oil & Gas, Power, Chemical, Pulp & Paper, Metals & Mining, Food & Beverage and Pharmaceutical*

### WirelessHART<sup>™</sup>

Expanding the Possibilities

#### Smart Wireless Gateway

- Web Interface, no special software needed
- Compatible with any host: Modbus®, Ethernet, OPC
- AMS® Suite: Intelligent Device Manager

#### Smart Wireless THUM™ Adapter

- Enable enhanced valve operational information
- Gain access to advanced instrument diagnostics
- Make any HART device wireless to enable access to diagnostics

#### Rosemount 3051S Wireless Series of Instrumentation

- Integrated wireless pressure, level and flow solutions
- Built on proven Super Module® Platform
- Stability: 10 years  
Warranty: 12 years

#### Rosemount 648 Wireless Temperature Transmitter

- Accepts a wide variety of sensor types
- Accepts a 4-20 mA input
- Complete Point Solutions offering

#### Rosemount 702 Wireless Discrete Transmitter

- Discrete switch input
- Flow, level, pressure, temperature applications
- Valve positioning
