

BKW are more than just a process instrumentation supplier; we can design, build, test and supply the complete package. Ranging from our QuickShip stock to full project specification orders. We can meet your every requirement.

Repairs

BKW's unique repair facility is available to take all types of instruments, from any manufacturer. Due to our vast knowledge and experience not only do we repair the instrument we also determine the cause of the problem that leads to the instrument failure.

Manufacturing

Our state of the art Manchester factory enables us to quickly adapt standard instruments to meet your exact application, whilst manufacturing to EU and International standards. We have years of design and engineering excellence to offer you.

Installation & Commissioning

Our team of highly qualified engineers can assist with installation and commissioning services to our customers and have proven to be a cost effective and welcome solution. The combination of our extensive knowledge of instrumentation and highly experienced site engineers ensure a seamless and effective transfer from the design and manufacturing stage to the final installation.

Calibration

BKW offer a comprehensive on-site and workshop based service to all industry sectors. We specialise in the calibration and maintenance of process instrumentation. BKW will always discuss your exact calibration requirements whether this is on-site or workshop based and will always endeavour to provide you with a service that meets your exact requirements however demanding.

Testing and Documentation

BKW can provide a wide range of testing and documentation. Ranging from Pressure and Temperature Calibrations to CAD Drawings. We are able to supply full project specification documentation packs.
