

Temperature Controller for Rail Mounting

PID Controller, Dimensions 75 x 22.5 mm

Model CS4R

WIKA Data Sheet AC 85.05

Applications

- Plant and industrial furnace construction
- Process engineering
- Plastics technology and processing
- Ventilation and air conditioning technology
- General industrial applications

Special Features

- Control characteristic adjustable (PID, PI, PD, P, ON/OFF)
- Integrated auto-tuning function
- Control output optionally relay, logic level or 4 ... 20 mA
- Multi-function input for Pt100, thermocouples and industry standard signals
- Optionally with heater burnout alarm and serial interface

Temperature Controller Model CS4R

Description

Model CS4R is a compact digital temperature controller for displaying, controlling and monitoring temperatures.

The controller has a multi-function input, i. e. the input configuration is adjustable.

Thereby the flexibility of the controller is significantly increased, stock-keeping is simplified.

An alarm output for process value and control loop monitoring is also available as standard.

The control parameters can be set over wide ranges. An auto-tuning function can be activated, which makes it easier to find the ideal control parameters.

The controllers are designed for rail mounting.

The control output is alternatively equipped with a relay (for slow controls), with a logic level to drive a solid state relay (for fast controls and high current loads) or with an analogue current signal 4 ... 20 mA.

The versions with control output 4 ... 20 mA can be re-configured and used as transmitter with output signal 4 ... 20 mA.

Optionally available are a heater burnout alarm for heat current monitoring and a serial interface RS-485.

Specifications	Model CS4R
Display	
- Process value	7-segment-LED, 4-digit, red, character size 7.5 mm
- Setting value	7-segment-LED, 4-digit, green, character size 7.5 mm
- Indication range	-1999 ... 9999
Input	
- Number and type	1 multi-function input for resistance thermometers, thermocouples and industry standard signals
- Input configuration	Selectable via terminal configuration and menu-driven programming
- Resistance thermometers	Pt100, JPt100, 3-wire max. permissible resistance per wire: 10 Ω
- Thermocouples	Type K, J, R, S, B, E, T, N, PL-II, C (W/Re5-26) max. permissible external resistance: 100 Ω for type B: max. 40 Ω
- Standard signals	0 ... 20 mA, 4 ... 20 mA input resistance 50 Ω (external shunt, optionally available) max. permissible input current: 100 mA
	0 ... 1 V input resistance > 1 MΩ
	max. permissible input voltage: 5 V
	0 ... 5 V, 1 ... 5 V, 0 ... 10 V input resistance > 100 kΩ
	max. permissible input voltage: 15 V
- Measuring time	250 ms
Control output	3 different versions are possible
- Relay contact	Load: AC 250 V, 3 A (resistive load) AC 250 V, 1 A (inductive load, $\cos \varphi = 0.4$)
- Logic level	DC 0/12 V max. 40 mA (short-circuit proof)
	To actuate a solid state relay
{- Analogue current signal}	4 ... 20 mA, load max. 550 Ω
	The control output 4 ... 20 mA can be reconfigured as a transmitter output 4 ... 20 mA
Control characteristic	PID, PI, PD, P, ON/OFF (adjustable)
Control parameters	An auto-tuning function can be activated to find suitable control parameters
- Proportional band	0 ... 110 %
- Integral time	0 ... 1000 s
- Differential time	0 ... 300 s
- Cycle time	1 ... 120 s (not available with control output analogue current signal)
- Hysteresis	Only available with ON/OFF control characteristics
	Thermocouples and resistance thermometers: 0.1 ... 100.0 °C
	Standard signals: 1 ... 1000 (the placement of the decimal point follows the input configuration)
Alarm output	Open-collector
	Load: DC 24 V, max. 0.1 A
- Alarm output 1	For process value and control loop monitoring
	Alarm type, switching mode, hysteresis and delay adjustable
{- Heater burnout alarm} ¹⁾	For 1 phase heating systems (not available with control output analogue current signal)
	Alternatively for max. 5 A, 10 A, 20 A or 50 A
	Current transformer is supplied with controller
{Serial interface}	RS-485
	The transfer rate is adjustable (2400 bps, 4800 bps, 9600 bps or 19200 bps)
Power supply	AC 100 ... 240 V, 50/60 Hz (max. permissible 85 ... 264 V) or AC/DC 24 V, 50/60 Hz (max. permissible 20 ... 28 V)
Power consumption	Approx. 6 VA
Ambient conditions	
- Ambient temperature	0 ... 50 °C
- Storage temperature	-20 ... +50 °C
- Humidity	35 ... 85 % relative humidity, non-condensing
Case	
- Material	Polycarbonate
- Colour	Light grey
- Mass	Approx. 150 g
- Mounting	Snap on mechanism for mounting on a DIN rail

{ } Items in curved brackets are optional extras for an additional price.

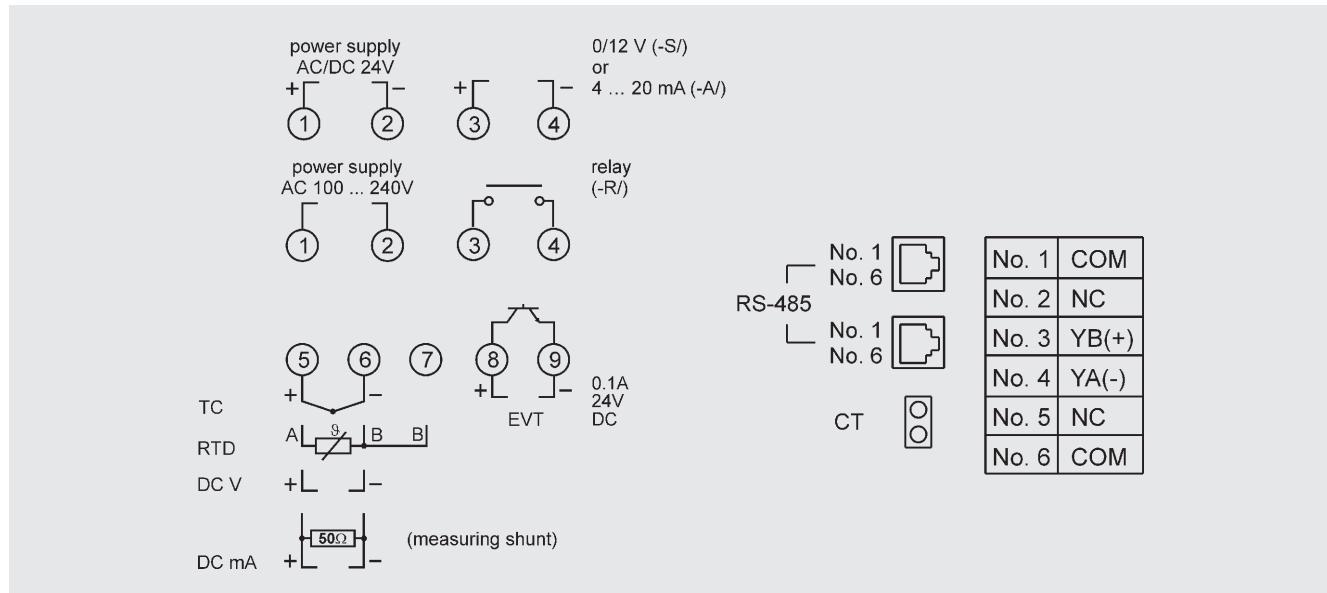

1) In case of combination of alarm output 1 and heater burnout alarm they act on a common Open-collector output.
